Sheth L.U.J College of Arts & Sir M.V. College of Science and Commerce

Department of Information Technology (B.Sc.I.T Semester V)

Artificial Intelligence Application Development and Jira

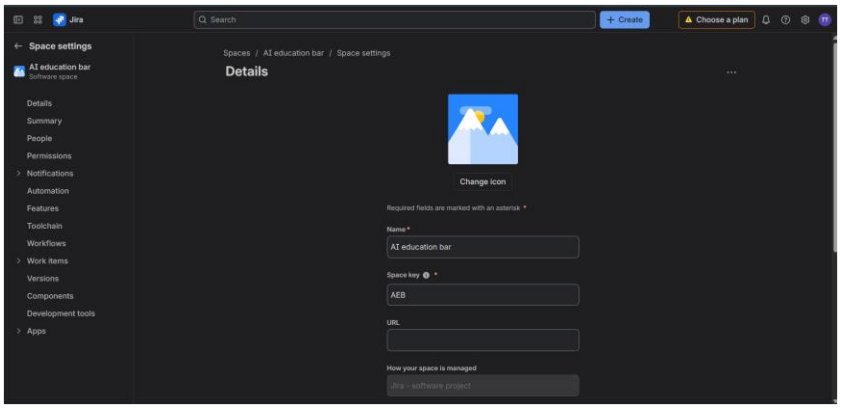

Practical – 10(M2)

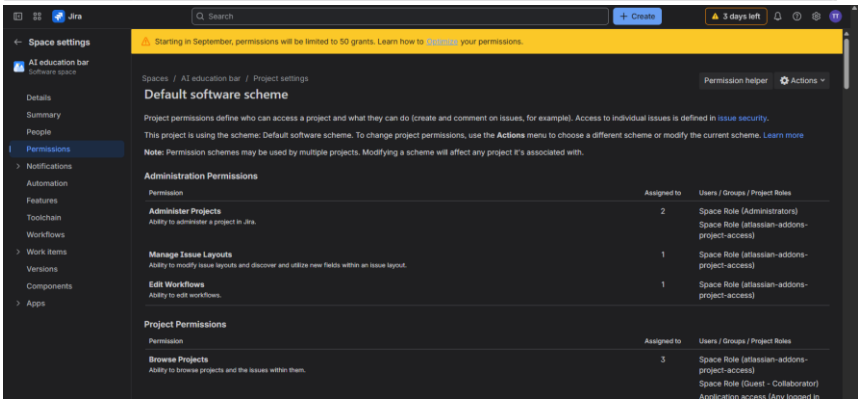

Roll No.: T045	Name: Omkar Thukarul
Class:TYIT	Batch:1
Date of Assignment: 26/09/2026	Date/Time of Submission: 26/09/2026

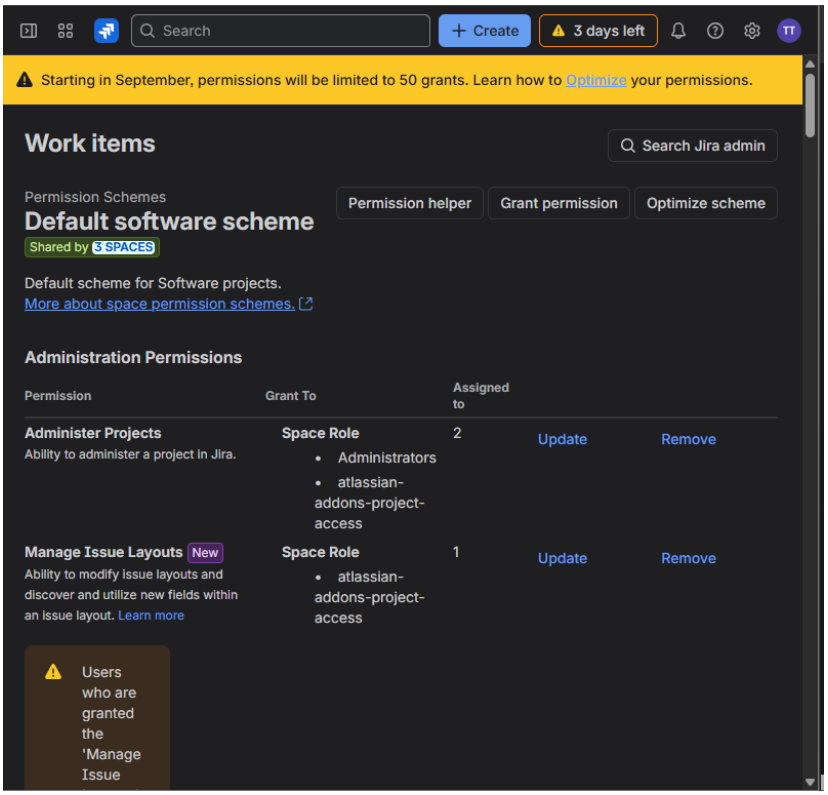

Aim:Permission & Security Management

A. View and modify Project Permission Scheme.

1. Open Jira and open the required Project/Space.
2. Click Space settings.
3. Click Permissions.
4. The Permission and Security Management page will be displayed.
5. View the Default software scheme and the available project permissions.
6. Check the permissions assigned to the different users, groups and roles.
7. To modify a permission, click Actions.
8. Select Edit permissions.
9. Modify the required permission according to the requirement.
10. Save the changes.
11. Verify that the permission has been updated successfully.

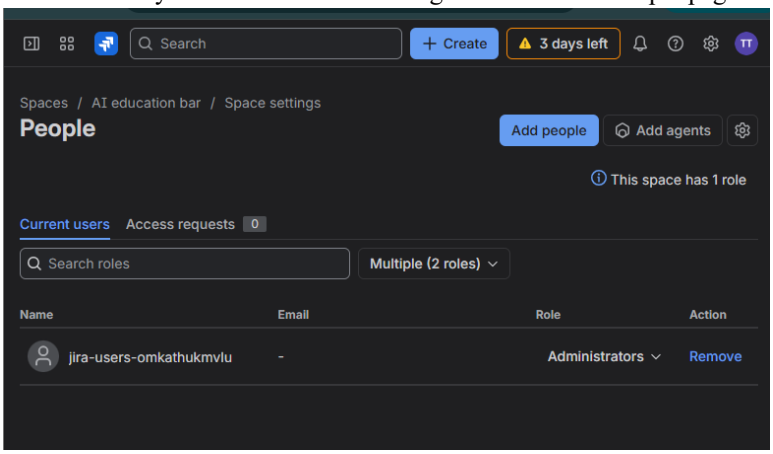

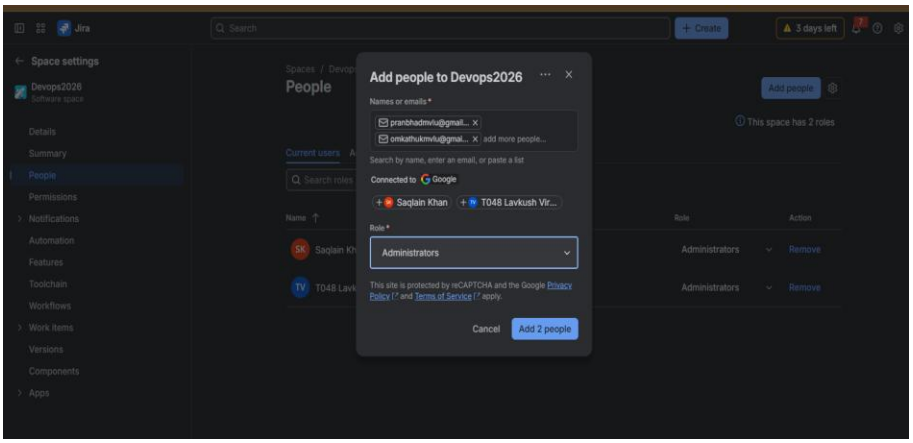

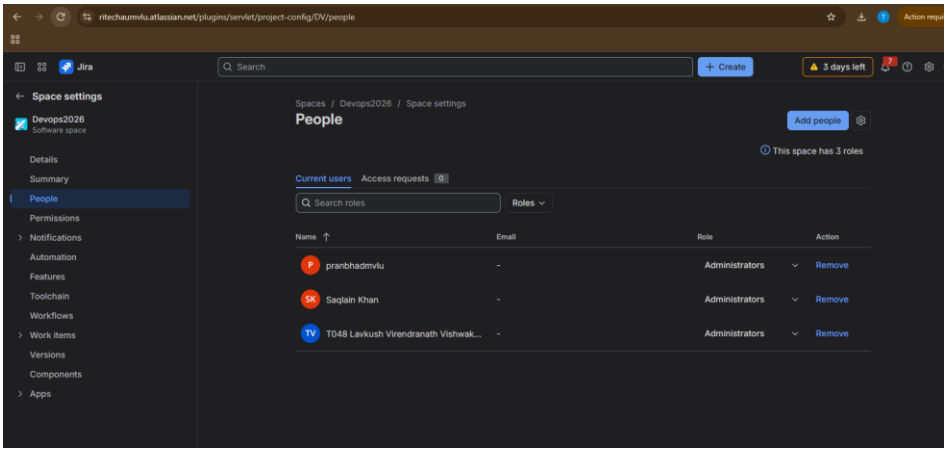

B. Configure Project Roles and assign permissions.

1. Open the required Jira Project/Space.
2. Click Space settings.
3. Click People.
4. The People page will be displayed.
5. Check the users currently added to the project.
6. To add a new user, click Add people.
7. Select the required user/users.
8. Select the required role for the user.
9. Click Add.
10. The new person will be added to the project with the selected role.
11. Verify the user's name and assigned role on the People page.
