Practical – 5(M2)

Roll No.: T045	Name: Omkar Thukarul
Class:TYIT	Batch:1
Date of Assignment: 02/09/2026	Date/Time of Submission: 02/09/2026

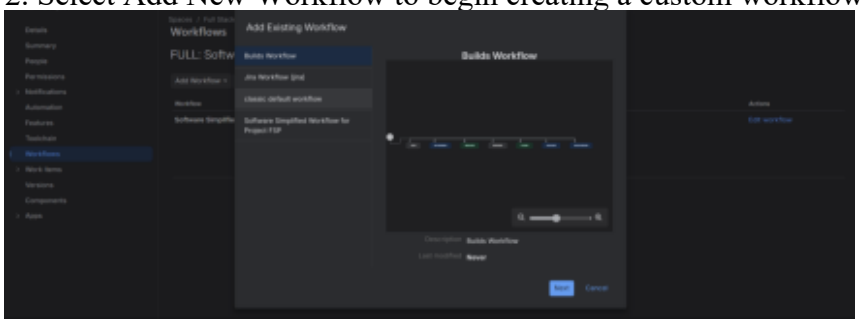

A). Design a Custom Workflow

Steps:-

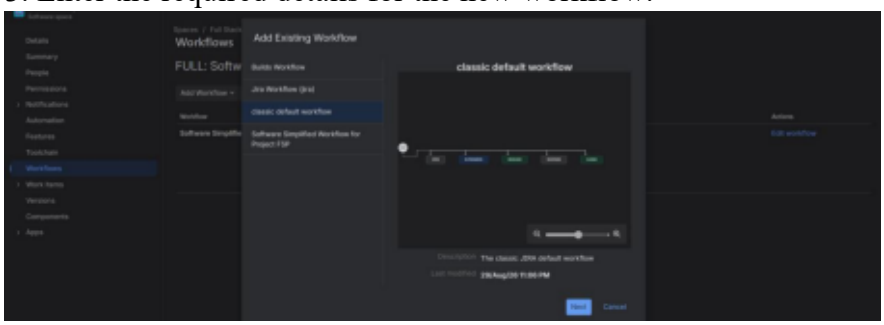

1. Open the Jira project and navigate to the Workflow section.

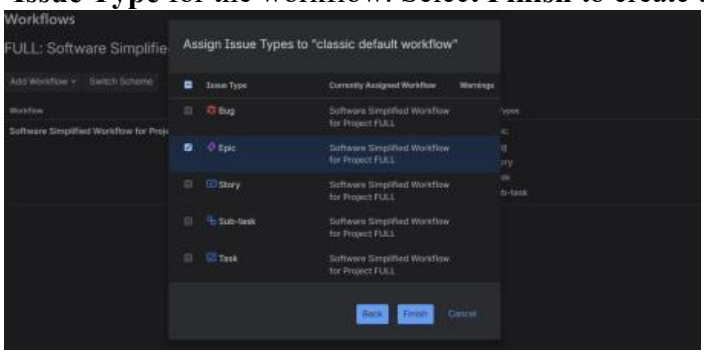

2. Select Add New Workflow to begin creating a custom workflow.

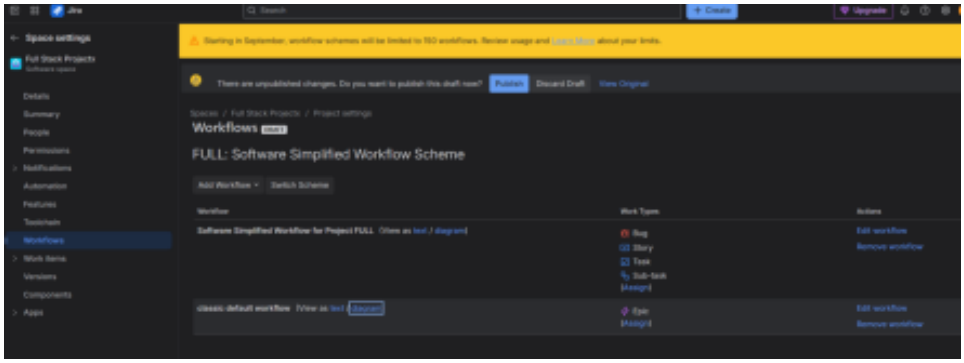

3. Enter the required details for the new workflow.

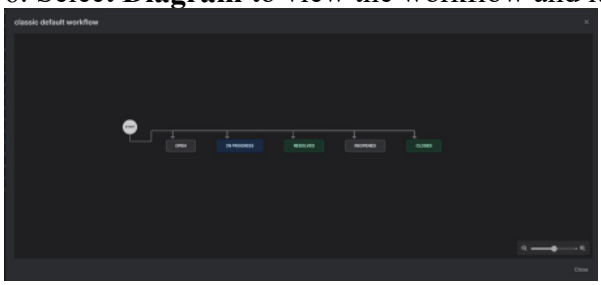

4. Choose the required workflow type and proceed with **Next**. Select the appropriate **Issue Type** for the workflow. Select **Finish** to create the custom workflow

5. The newly created workflow will appear in the **Workflow** section.

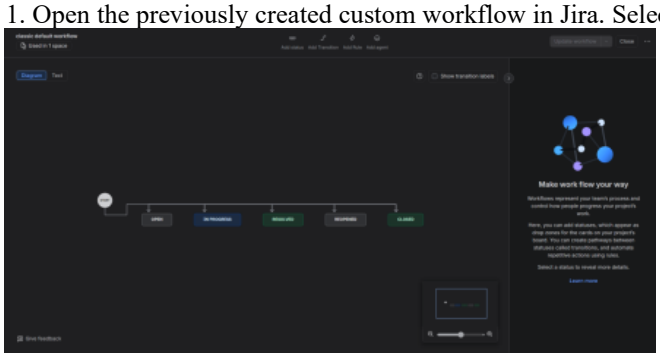

6. Select **Diagram** to view the workflow and its associated statuses.

B). Add Transitions and Conditions

Steps:-

1. Open the previously created custom workflow in Jira. Select Edit Workflow to modify the workflow.

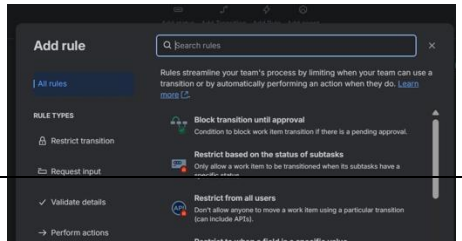

2. Choose the status from which the required transition needs to be created. Select Add Transition to create a new transition. Enter the required details for the transition. Select Create to add the transition to the workflow.

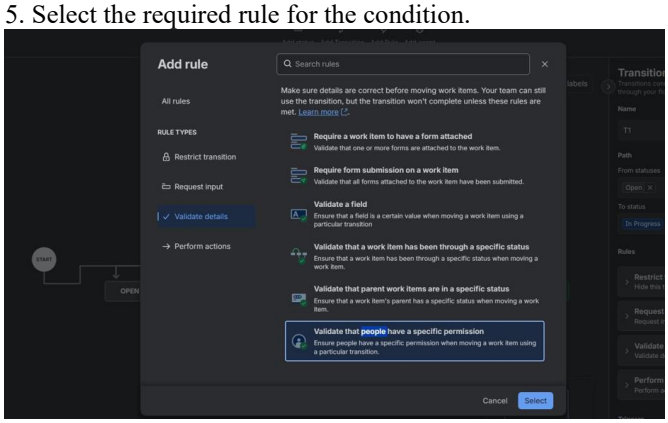

3. Select Update Workflow to save the changes.

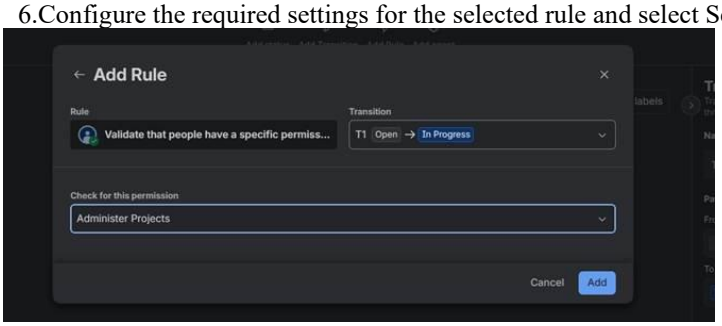

4. To add a condition, select the required transition and choose Add Rule to Conditions

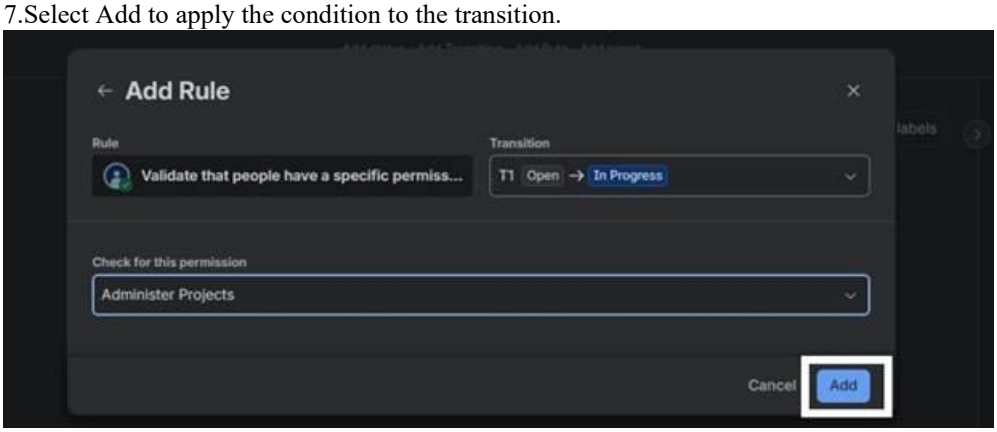

5. Select the required rule for the condition.

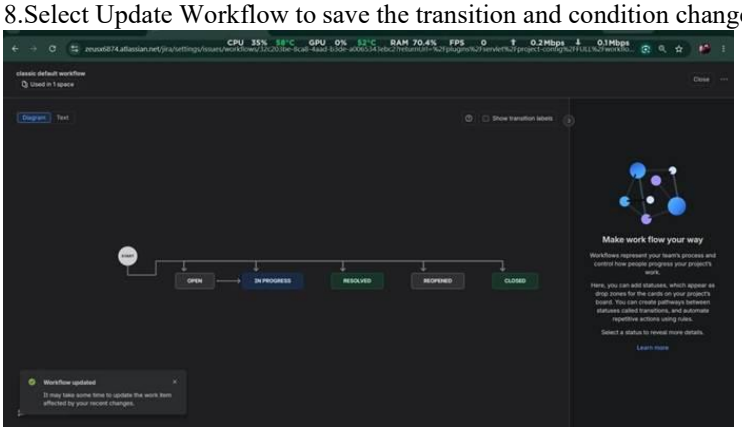

6.Configure the required settings for the selected rule and select Select.

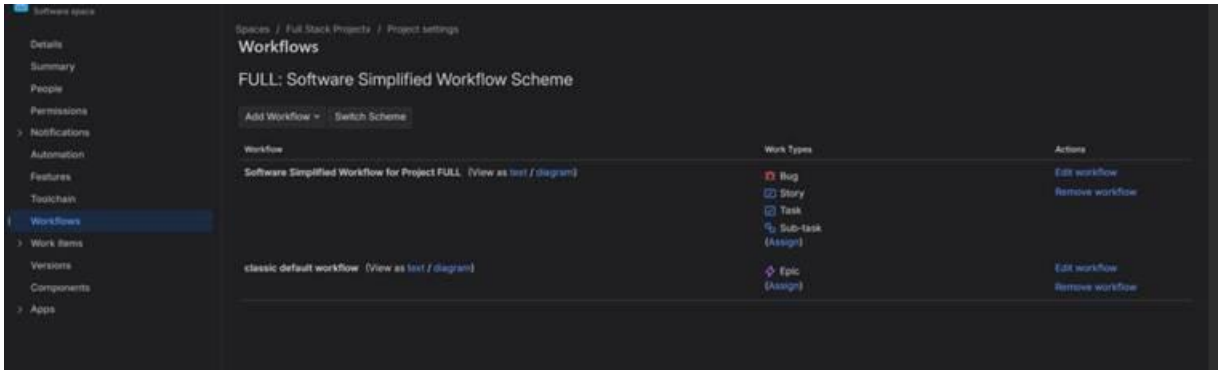

7.Select Add to apply the condition to the transition.

8.Select Update Workflow to save the transition and condition changes.

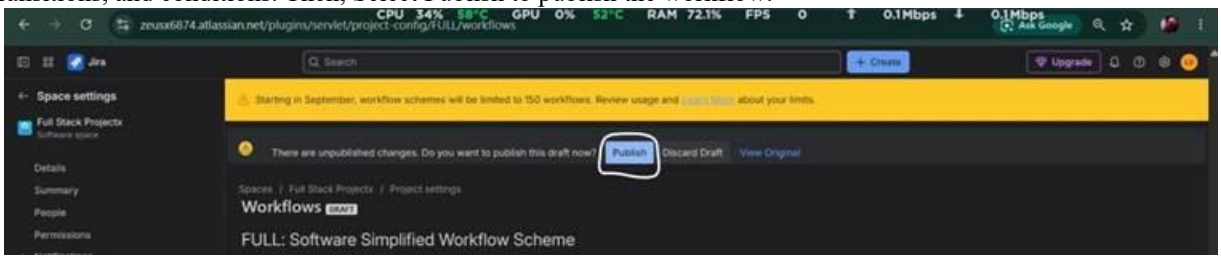

9.Select Close and return to the Workflow section.

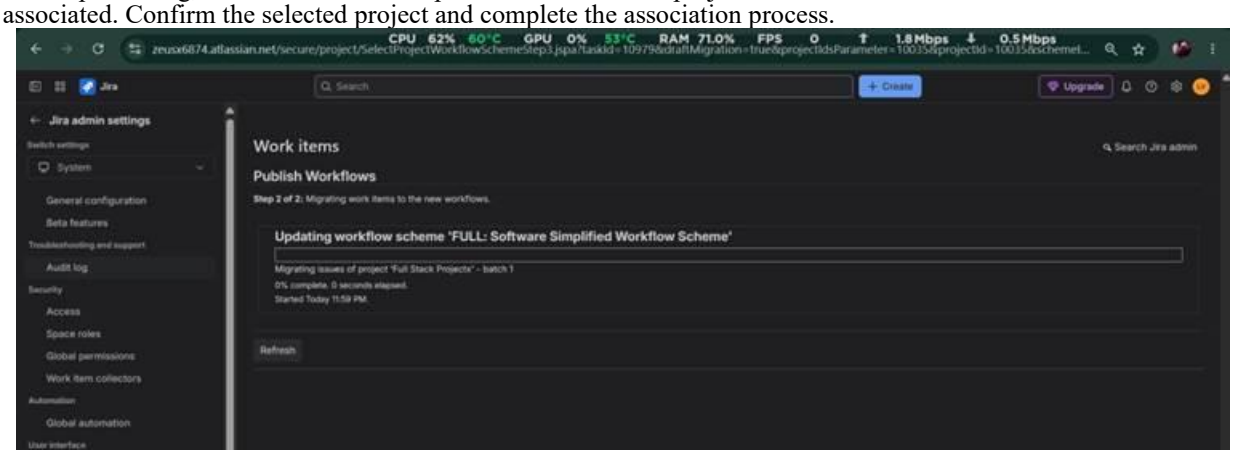

C). Publish and Associate Workflow with a Project

Steps:-

1.Open the created custom workflow from the Jira Workflow section. Review the workflow, including its statuses, transitions, and conditions. Then, Select Publish to publish the workflow.

2After publishing, select the Associate option. Choose the Jira project with which the workflow needs to be associated. Confirm the selected project and complete the association process.

3Allow Jira to update and apply the workflow changes to the selected project. If a workflow update confirmation appears, select Acknowledge.
