Artificial Intelligence Application Development and Jira

Practical – 1(M2)

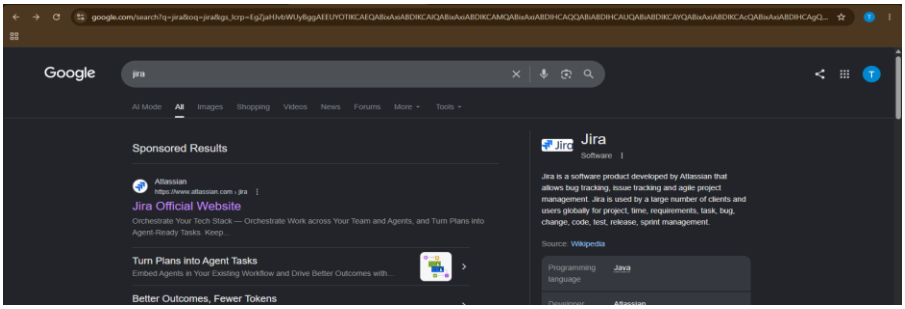

Roll No.: T045	Name: Omkar Thukarul
Class:TYIT	Batch:1
Date of Assignment: 29/08/2026	Date/Time of Submission: 29/08/2026

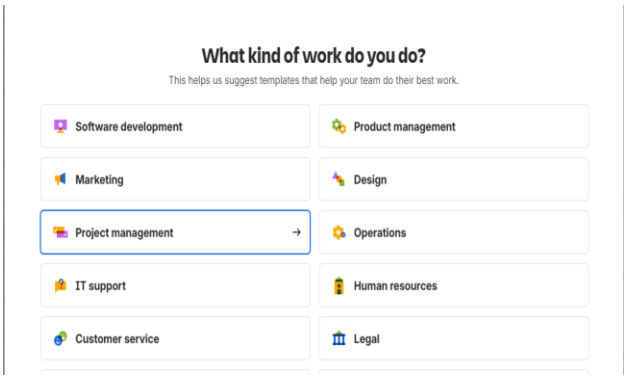

AIM:- Jira Setup & Project Creation

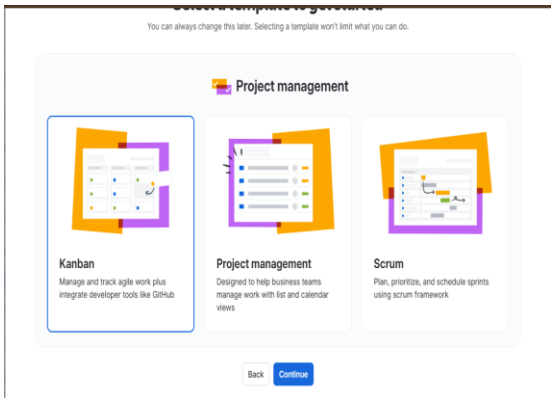

A. Create a Jira Cloud account and explore the dashboard.

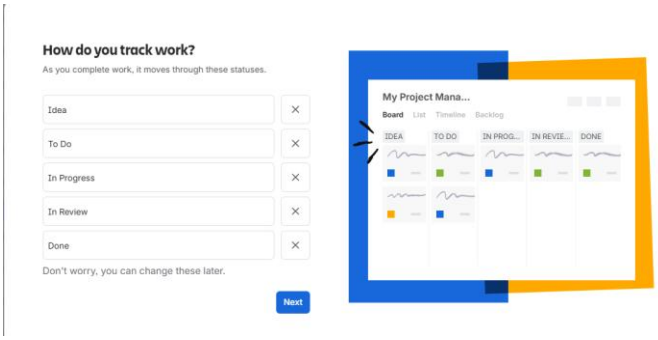

Steps:-

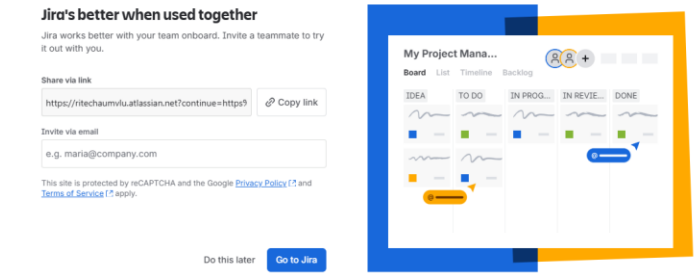

1. Open Google Chrome or any web browser.
2. Open Google and search for Jira.
3. Open the official Jira Cloud website.
4. Click Get it free or Sign up.
5. Enter your required email/account details and click Continue.
6. Complete the account verification and account-creation steps shown on the screen.
7. Wait for Jira to complete the initial setup. The "Getting things ready" screen will appear.
8. When prompted to select the type of work, choose Project management.
9. From the available templates, select Kanban.
10. Click Next.
11. Enter a suitable name in the Name your space field.
12. Select the appropriate option for tracking your work.
13. Click Next and select the required type of work when prompted.
14. Click Go to Jira.
15. After setup is completed, the Jira Dashboard will appear.
16. Explore the dashboard and observe the available options such as:
17. Projects/Spaces
18. Boards
19. Issues or tasks
20. Navigation menu
21. Dashboard features
22. Result: A Jira Cloud account was created successfully and the Jira Dashboard was explored.

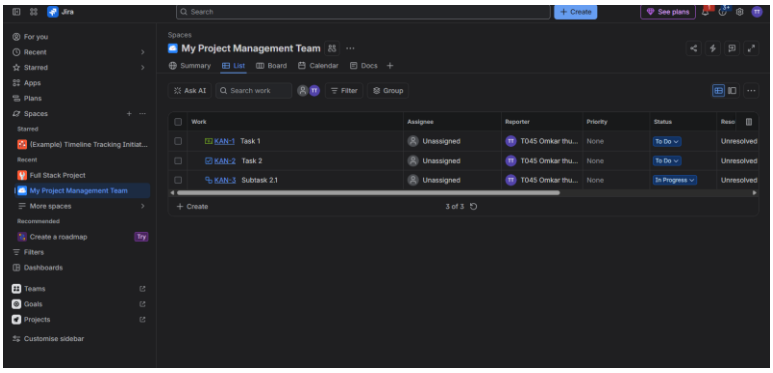

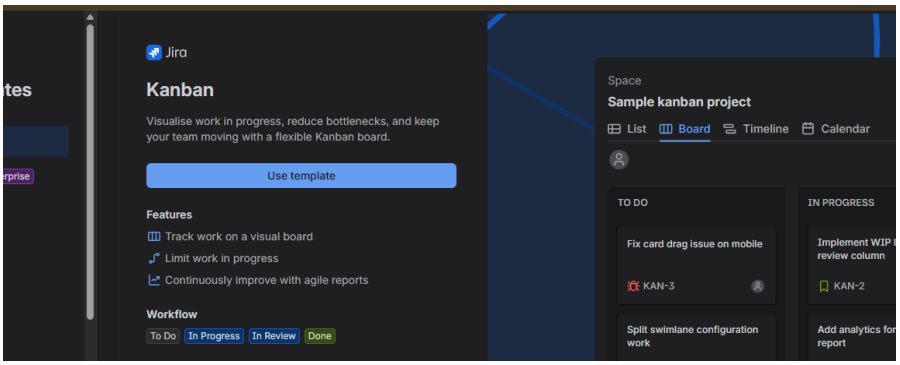

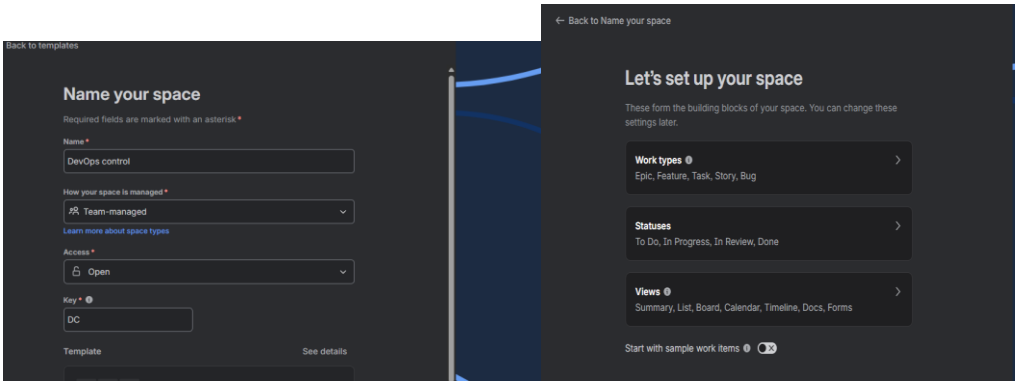

B. Create a Company-managed Scrum/Kanban Project.

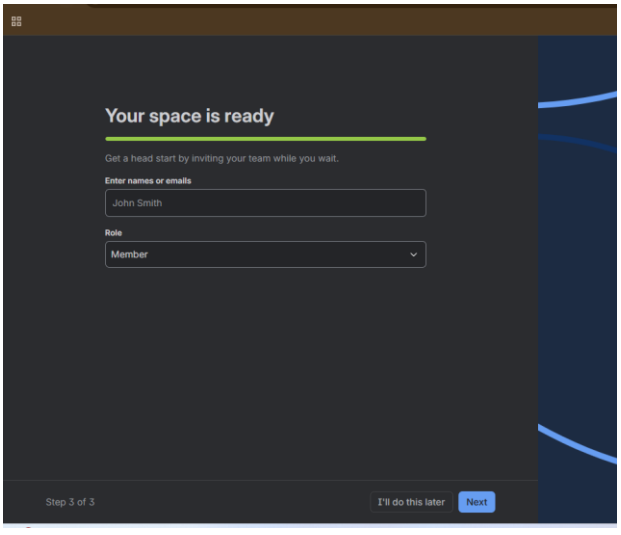

Steps:-

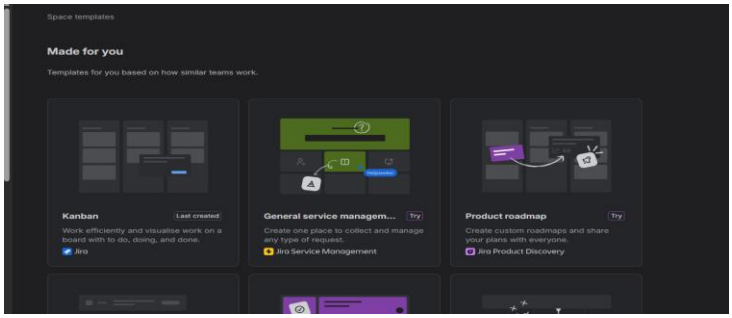

1. Log in to your Jira Cloud account.
2. From the Jira navigation menu, click Spaces (+).
3. Select Create space or the option to create a new project/space.
4. From the available templates, select Kanban.
5. Click Use template.
6. Enter a suitable Space Name.
7. In the Space managed option, select Company-managed.
8. Click Next.
9. Add the email addresses of the team members you want to include.
10. If you do not want to add members now, select I'll do this later.
11. Complete the project creation process.
12. After creation, the Kanban Board will appear.
13. Observe the board columns, which generally represent different stages of work, such as:

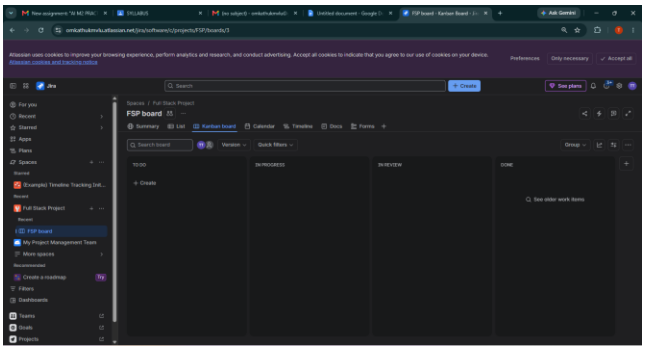

14. To Do
15. In Progress
16. Done
17. Create or observe tasks/cards on the board.
18. Move tasks between columns to understand how work progress is tracked.
19. Result: A company-managed Kanban project was created successfully and its Kanban Board was explored.

C. Configure project details

Steps:-

1. Open the Jira space/project created in Practical 1B.
2. From the project navigation menu, locate Space settings.
3. Click Space settings.
4. Explore the available configuration options.
5. Open the Details section.
6. View the basic information about the project/space, such as its name and other available project details.
7. Check the available settings and configuration options.
8. Make any required changes to the project details.
9. Save the changes if Jira provides a Save option.
10. Return to the project/space to verify the configuration.
11. Result: The project settings were opened and the project details were successf
12. ully viewed/configured.
