Practical – 7(M2)

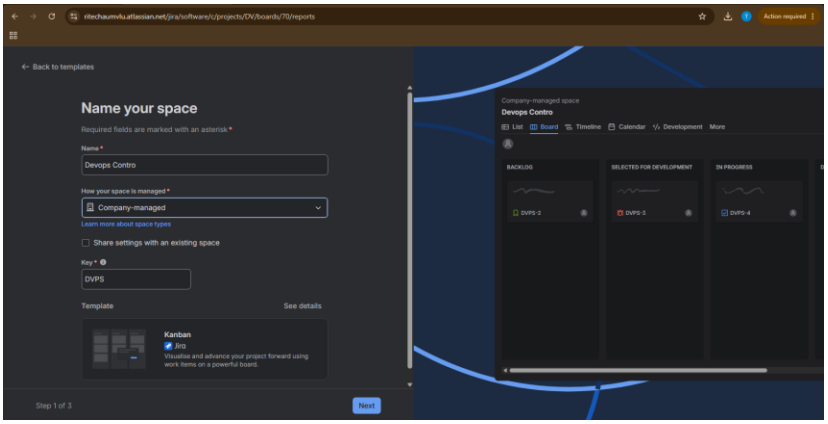

Roll No.: T045	Name: Omkar Thukarul
Class:TYIT	Batch:1
Date of Assignment: 12/09/2026	Date/Time of Submission: 12/09/2026

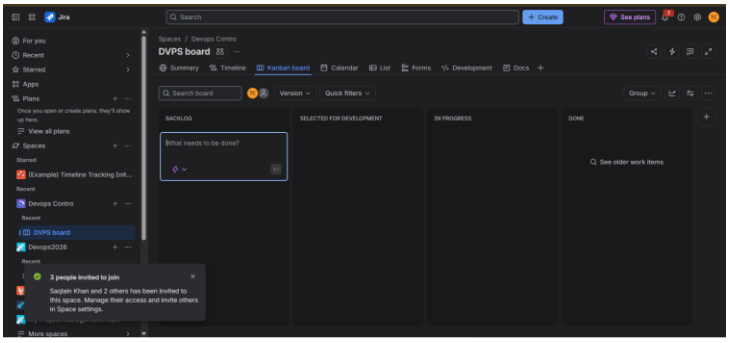

A. Create a Company-managed Kanban Project.

Steps

1. Login to Jira.
2. Click on Spaces.
3. Select Create Spaces.
4. Select the Kanban template.
5. Click Use Template.
6. Enter the required Space/Project details.
7. Select Company-managed.
8. Click Next.
9. Add the required Team Members.
10. Click Next.
11. The Kanban Board will be created.
12. Open the created board and verify that it is displayed.

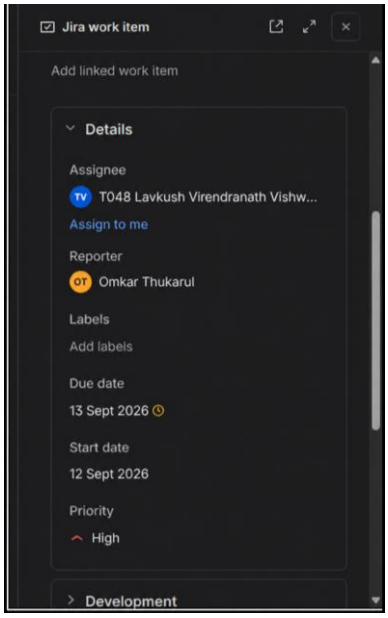

B. Configure Kanban Board

A. Create Backlog Task

1. Open the Kanban Board.

2. Go to the Backlog section.
3. Click Create.
4. Select the issue type Task.
5. Enter the task name.
6. For example, enter:
   Create user registration and login system
7. Click Create or press Enter.
8. The task will appear in the Backlog.

The manual shows creating a backlog task and selecting the Task issue type.

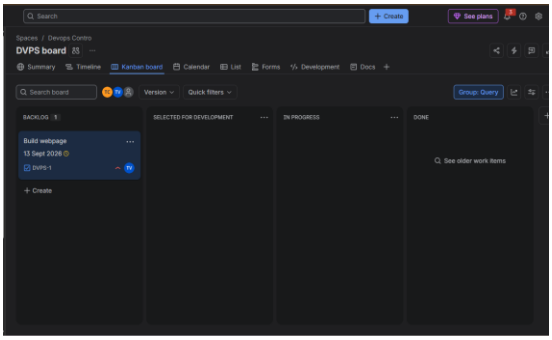

B. Assign Task to User

1. Open the created task.
2. Find the Assignee option.
3. Click on Assignee.
4. Select the required team member.
5. Save/update the task.

The task is now assigned to the selected user.

C. Set Priority and Due Date

1. Open the task.
2. Find the Priority field.
3. Select the required priority.
4. Find the Due Date field.
5. Select the required date.
6. Save/update the task.
7. Return to the Kanban Board.

C. Track issue progress and generate Control Chart

A. Track Issue Progress

1. Open the Kanban Board.
2. Locate the created task.
3. Track the task as it moves through the board.
4. Move the task to the appropriate status as work progresses.
5. For example:

Backlog → To Do → In Progress → Done

6. When the work is completed, move the task to Done.

The manual shows tracking issue progress on the Kanban Board.

B. Generate Control Chart

1. Open the Kanban Board.
2. Click Reports.

3. Go to the Agile section.
4. Select Control Chart.
5. Select the required time period/options if asked.
6. Jira will generate the Control Chart.
7. Observe the chart showing the progress/cycle time of issues.
8. Take a screenshot of the Control Chart for your practical file.
